E.M.G. YADAVA WOMEN'S COLLEGE, MADURAI – 625 014. (An Autonomous Institution – Affiliated to Madurai Kamaraj University) Re-accredited (3rd Cycle) with Grade A⁺ & CGPA 3.51 by NAAC

CRITERION - I

1.1.3 Details of courses offered by the institution that focus on employability / entrepreneurship / skill development during the year.

E.M.G.YADAVA WOMEN'S COLLEGE, MADURAI-14.

(An Autonomous Institution – Affiliated to Madurai Kamaraj University)

Re-accredited (3rd Cycle) with Grade A⁺ and CGPA 3.51 by NAAC

DEPARTMENT OF MATHEMATICS-PG

TANSCHE – CBCS WITH OBE

(w.e.f. 2023 – 2024 onwards)

VISION

To mold the students to have strong Mathematical and Analytical skills to meet the challenges open to them.

MISSION

To provide the students with a strong Mathematical Foundation through courses which cater to the needs of Industry, Research and Higher Education

PEO	On completion of the Programme the student will be able to
PEO1	Apply their knowledge in modern industry or teaching, or secure acceptance in high quality graduate programs in mathematics.
PEO2	Keep on discovering new avenues in the chosen field and exploring areas that remain conducive for research and development.
PEO3	Promote the culture of interdisciplinary research among all disciplines and Applied Mathematics.
PEO4	Handle the problems faced by industry through Mathematical knowledge and scientific computational techniques
PEO5	To develop teaching skills, subject knowledge in the course of their study which will help them to shine in various field including Education ,IT etc.,

Programme Educational Objectives (PEOs)

Programme Outcomes (POs) with Graduate Attributes

PO	Graduate Attributes	On completion of the Programme the student will be able to
PO1	Problem Solving Skill	Apply knowledge of Management theories and Human Resource practices to solve business problems through research in Global context
PO2	Decision Making Skill	Foster analytical and critical thinking abilities for data-based decision-making
PO3	Ethical Value	Ability to incorporate quality, ethical and legal value-based perspectives to all organizational activities.
PO4	Communication Skill	Ability to develop communication, managerial and interpersonal skills
PO5	Employability Skill	Inculcate contemporary business practices to enhance employability skills in the competitive environment
PO6	Individual and Team Leadership Skill	Capability to lead themselves and the team to achieve organizational goals.

Programme Specific Outcomes (PSOs) with Graduate Attributes

PSO	Graduate Attributes	On completion of the Programme the student will be able to
PSO1	Placement	To prepare the students who will demonstrate respectful engagement with others' ideas, behaviors, beliefs and apply diverse frames of reference to decisions and actions
PSO 2	Entrepreneur	To create effective entrepreneurs by enhancing their critical thinking, problem solving, decision making and leadership skill that will facilitate startups and high potential organizations.
PSO 3	Research and Development	Design and implement HR systems and practices grounded in research that comply with employment laws, leading the organization towards growth and development.
PSO 4	Contribution to Business World	To produce employable, ethical and innovative professionals to sustain in the dynamic business world.
PSO 5	Contribution to the Society	To contribute to the development of the society by collaborating with stakeholders for mutual benefit.

Eligibility for Admission: Pass in B.Sc., Mathematics

Duration of the Course:

The students shall undergo prescribed courses of study for the period of two academic years under CBCS semester pattern with Outcome Based Education.

Medium of Instruction: English

System: TANSCHE - Choice Based Credit System with Outcome Based Education.

Nature of the Course

Courses are classified according to the following nature

- 1. Knowledge & Skill
- 2. Employability Oriented
- 3. Entrepreneurship Oriented

Outcome Based Education (OBE) & Assessment

Students understanding must be built on and assessed for wide range of learning activities, which includes different approaches and are classified along several bases, such as

1. Based on purpose:

- Formative (Internal tests, Assignment, Seminar, Quiz, Documentation, Case lets, ICT based Assignment, Mini Projects administered during the learning process)
- Summative (Evaluation of students learning at the end of instructional unit)

2. Based on Domain knowledge: (Post Graduate Up to K5 Levels)

• Assessment through K1, K2,K3, K4 & K5

Evaluation

Continuous Internal Assessment Test (CIA)	: 25 Marks
Summative Examination	: 75 Marks
Total	: 100 Marks

CIA-Continuous Internal Assessment: 25 Marks

Components	Marks
Test (Average of two tests)	
(Conduct for 120 marks and converted into 12 marks)	12
Application-oriented/Innovation/Creativity	3
Assignment	
Assignment	5
Seminar	5
Total	25

- Centralized system of Internal Assessment Tests
- There will be a two Internal Assessment Tests
- Duration of Internal Assessment Test I and II will be 2 1/2 hours.
- Students shall write retest on the genuine grounds if they are absent in either Test I & Test II with the approval of Head of the Department.

Question Paper Pattern for Continuous Internal Assessment Test I and Test II

Section	Marks
A – Multiple Choice Questions (8x1Mark)	8
B – Short Answer (6 x 2 Marks)	12
C – Either Or type (4/8 x 5 Marks)	20
D – Open Choice type (2/4 x 10 Marks)	20
Total	60

Conducted for 120 marks and converted into 12 marks

Question Paper Pattern for Summative Examination

Section	Marks
A – Multiple Choice Questions without choice	10
(10x 1Mark)	
B – Short Answer Questions without choice (5 x 2 Marks)	10
C – Either Or type (5/10 X 5Marks)	25
D – Open Choice type(3out of 5 X 10Marks)	30
Total	75

• In respect of external examinations passing minimum is **45%** for Post Graduate Courses and in total, aggregate of **50%**.

Latest amendments and revisions as per UGC and TANSCHE Norms are taken into consideration in curriculum preparation.

Nature of the Course							
Knowledge and Skill Oriented	Employability Oriented	Entrepreneurship oriented					

Course Objectives

To introduce the concepts and to develop working knowledge on class equation, solvability of groups, finite abelian groups, linear transformations, real quadratic forms.

Course Content

Unit	Course Content	105 Hours	K Level	CLO
Ι	Another Counting Principle - Sylow's theorems	21	Up to K4	CLO 1
Π	Solvable groups - Direct products - Finite abelian groups- Modules.	21	Up to K4	CLO 2
III	Linear Transformations: Canonical forms – Triangular form - Nilpotent transformations	21	Up to K4	CLO 3
IV	Canonical forms – A Decomposition of V - Jordan form - Rational canonical form.	21	Up to K5	CLO 4
V	Trace and transpose - Hermitian, unitary, normal transformations - Real quadratic form.	21	Up to K5	CLO 5

Book for study:

I.N. Herstein, Topics in Algebra, 2nd Edition, John Wiley and Sons, NewYork 1975.

Chapters:

UNIT	CHAPTER(S)	SECTIONS
Ι	2	2.11 and 2.12 (Omit Lemma 2.12.5)
П	2,4,5	2.13 and 2.14 (Theorem 2.14.1 only), 5.7 (Lemma 5.7.1, Lemma 5.7.2, Theorem 5.7.1), 4.5
III	6	6.4 and 6.5
IV	6	6.6 and 6.7
V	6	6.8, 6.10 and 6.11 (Omit 6.9)

- 2. http://ocw.mit.edu/ocwweb/Mathematics,
- 3. <u>http://www.opensource.org</u>,
- 4. <u>www.algebra.com</u>

Pedagogy:

Chalk and Talk, Power point presentations, Group Discussions, Quiz, Assignment and Seminar.

E.M.G.Yadava Women's College, Madurai-14.

Rationale for nature of Course:

Knowledge and Skill:

- Acquaintance with the fundamental algebraic structures, namely group, rings and fields, essential for further study of algebra.
- Skill to apply in modern mathematics and other fields.

Activities to be given:

We will be providing students with intellectual problems, theory application problems, group discussion and other practical works and also insist them to check the Books for References and web resources.

Course Learning Outcome (CLOs)

On completion of the course, behind the students would be able to:

CO	Course Outcome	K-level
CO1	Recall basic counting principle, define class equations to solve problems, explain Sylow's theorems and apply the theorem to find number of Sylow subgroups.	Up to K4
CO2	Define Solvable groups, define direct products, examine the properties of finite abelian groups, define modules.	Up to K4
CO3	Define similar Transformations, define invariant subspace, explore the properties of triangular matrix, to find the index of nilpotence to decompose a space into invariant subspaces, to find invariants of linear transformation, to explore the properties of nilpotent transformation relating nilpotence with invariants.	Up to K4
CO4	Define Jordan, canonical form, Jordan blocks, define rational canonical form, define companion matrix of polynomial, find the elementary devices of transformation, apply the concepts to find characteristic polynomial of linear transformation.	Up to K5
CO5	Define trace, define transpose of a matrix, explain the properties of trace and transpose, to find trace, to find transpose of matrix, to prove Jacobson lemma using the triangular form, define symmetric matrix, skew symmetric matrix, adjoint, to define Hermitian, unitary, normal transformations and to verify whether the transformation in Hermitian, unitary and normal.	Up to K5

- K1- Remembering facts with specific answers
- K2- Basic understanding of facts.
- K3- Application oriented -Solving Problems
- K4- Analyzing, examining and making presentations with evidence
- K5- Evaluating, making Judgments based on criteria

E.M.G.Yadava Women's College, Madurai-14.

E.M.G.Yadava Women's College, Madurai-14.

Pedagogy:

• Chalk and Talk, Powerpoint presentations, Group Discussions, Quiz, Assignment and Seminar

Rationale for nature of Course:

Knowledge and Skill:

Demonstrate capacity for mathematical reasoning through analyzing , proving and explaining concepts from

Real Analysis and skill to apply for other field in mathematics.

Activities to be given:

We will be providing students with intellectual problems, theory application problems, group discussion and other practical works and also insist them to check the books for references and web resources.

Course Learning Outcome (CLOs)

On completion of the course, behind the students would be able to:

CLO	Course Learning Outcomes	Knowledge Level (According to Bloom's Taxonomy)
CLO1	Know how continuity of derivatives are generalized from real line	Up to K3
CLO2	Determine the Riemann-stieltjes integrability of a function ,prove a selection of theorems and concerning integration.	Up to K4
CLO3	Illustrate the effect of uniform convergence in the limit function with respect to continuity, differentiability and integrability.	Up to K4
CLO4	To be able to understand the concept of integration of differential forms.	Up to K5
CLO5	To be able to differentiate and integrate power series to obtain new ways to represent functions.	Up to K5

K1- Remembering facts with specific answers

- K2- Basic understanding of facts.
- K3- Application oriented
- K4- Analyzing, examining and making presentations with evidence.
- K5- Evaluating, making Judgments based on criteria

Sem	Category	Course Code	Course Title	Credits	Contact	CIA	SE	Total
					Hours/week			
1	Core	230PMA13	Ordinary Differential	4	6	25	75	100
			Equations					

Nature of the Course					
Knowledge and Skill Oriented	Employability Oriented	Entrepreneurship oriented			

Course Objectives:

- Develop strong background on finding solutions to linear differential equations with constant and variable coefficients and also with singular points.
- Study the existence and uniqueness of the solutions of first orderdifferential equations.
- To solve the second order and *n*-th order Initial value problems.
- Introduce the students to the technique of solving various problems of engineering and science.
- Study the concepts relating to the order and linearity of ODEs, analytic and computational solution methods for ODEs

Course Content:

Unit	Course Content	90 Hours	K Level	CLO
Ι	Linear equations with constant coefficients: Introduction - The Second order homogeneous equation -Initial value problems for second order equations -Linear dependence and independence- A formula for the Wronskian - The Non-homogeneous equation of order two.	18	Up toK4	CLO1
п	Linear equations with constant coefficients: The Homogeneous equation of order n - Initial value problems for n^{th} order equations – Equations with real constants – The non-homogeneous equation of order n – A special method for solving the non- homogeneous equation - Algebra of constant coefficient operators.	18	Up toK4	CLO2
ш	Linear equation with variable coefficients: Introduction - Initial value problems for the homogeneous equation Solutions of the homogeneous equation The Wronskian and linear independence- Reduction of the order of a homogeneous equation - The non-homogeneous equation Homogeneous equations with analytic coefficients-The Legendre equation.	18	Up toK4	CLO3
IV	Linear equation with regular singular points: Introduction – The Euler equation – Second order equations with regular singular points – an example – Second order equations with regular singular points – the general case – The Bessel Equation – The Bessel Equation (continued) .	18	Up toK5	CLO4

			Annexure-1	
V	Existence and uniqueness of solutions to first order equations: Introduction - Equation with variables separated – Exact equations – method of successive approximations – The Lipschitz condition – convergence of the successive approximations.	18	Up toK5	CLO5

Book for study:

E.A.Coddington, A introduction to ordinary differential equations (3rdPrinting) Prentice-Hall of India Ltd., New Delhi, 1987.

Chapters:

UNIT	CHAPTER(S)	SECTIONS
Ι	2	1 to 6
II	2	7 to 12.
III	3	1 to 8
IV	4	1 to 4, 7 & 8
V	5	1 to 6

Pedagogy:

• Chalk and Talk, Powerpoint presentations, Group Discussions, Quiz, Assignment and Seminar

Activities to be given:

We will be providing students with intellectual problems, theory application problems, group discussion and other practical works and also insist them to check the books for references and web resources.

Course Learning Outcome (CLOs)

On completion of the course, behind the students would be able to:

CLO	Course Learning Outcomes	Knowledge Level (According to Bloom's Taxonomy)
CLO1	Obtain the solutions of second order homogenous and non-homogenous linear differential equation with constant coefficients and understand the utility of Wronskian, linear independence and linear independence solutions.	Up to K4
CLO2	Understand the concepts regular singular points and solve the Bessel equation.	Up to K4
CLO3	Understand the concept of successive approximation, the Lipchitz condition and prove local and Non-local existence theorems	Up to K4
CLO4	Classify first order partial differential equations and their solutions and solve those using different methods.	Up to K5
CLO5	Solve the first order linear and nonlinear PDE's by using charpits and Jacobi's method respectively.	Up to K5

- K1- Remembering facts with specific answers
- K2- Basic understanding of facts.
- K3- Application oriented
- K4- Analyzing, examining and making presentations with evidence.
- K5- Evaluating, making Judgments based on criteria

Mapping of Course Learning Outcomes (CLOs) with Programme Outcomes (POs)

Nature of the Course				
Knowledge and Skill Oriented	Employability Oriented	Entrepreneurship oriented		

Course Objectives:

- To introduce the Revised simplex method and to make them performparametric analysis.
- To make them understand the limitations of simplex method in derivinginteger solution to linear programming problems.
- To illustrate various dynamic programming models and their applications in solving a decision-problem.
- To introduce the concept of classical optimization techniques.
- To appreciate the use of some of the non-linear programming techniques such as quadratic and separable programming.

Unit	Course Content	75 Hours	K Level	CLO
Ι	Network Models: Network Definitions – Minimal Spanning tree Algorithm – Shortest Route Problem – Examples of the Shortest Route Applications – Shortest Route Algorithms – Maximal flow Model – Maximum flow algorithm - CPM – PERT – CPM Computations – Construction of the Time Schedule.	15	Up toK3	CL01
п	Deterministic Inventory Models: General Inventory Model - Role of demand in the development of Inventory models - Static Economic order Quantity EOQ Models – Classic EOQ Model – EOQ Problems with Price Breaks – Multiitem EOQ with storage limitation- Dynamic EOQ models – No- Setup model – Set up model	15	Up toK4	CLO2
ш	Queuing Systems: Elements of Queuing model - Role of Exponential Distribution – Pure Birth and Death Models – Pure Birth models _ Pure Death Model – Generalized poisson Queuing model – Specialized poisson Queues – Steady State Measures of Performance – Single Server Models – Multiple server models – Machine Servicing Model (M/M/R) (GD/K/K); R <k< td=""><td>15</td><td>Up toK4</td><td>CLO3</td></k<>	15	Up toK4	CLO3

Pedagogy :

Chalk and Talk, Group Discussion, Student Seminar, Spot Test, Assignments, Quiz.

Rationale for Nature of the Course:

Knowledge and Skill

To understand the concept of fuzzy and its application in various field

E.M.G.Yadava Women's College, Madurai-14.

Activities to be given:

We will be providing students with intellectual problems, theory application problems, group discussion and other practical works and also insist them to check the Books for References and web resource

Course Learning Outcomes (CLO):

On successful Completion of the course Students will be able to

CLO	Course Learning Outcomes	Knowledge Level (According to Bloom's Taxonomy)		
CLO1	Understand to Examine the Basic Concepts of Crisp sets and Fuzzy sets	Up to K4		
CLO2	Describe Fuzzy Operations	Up to K4		
CLO3	Understand the concept of Fuzzy Arithmetic	Up to K4		
CLO4	Determine the difference between Crisp and Fuzzy Relation	Up to K5		
CLO5	Use Fuzzy Relation as tools to Visualize and Simplify	Up to K5		

K1- Remembering and recalling facts with specific answers

- K2- Basic understanding of facts and stating main ideas with general answers
- K3– Application oriented Solving Problems
- K4 –Examining, analyzing, presentation and make inferences with evidences
- K5- Evaluating, making Judgments based on criteria

Activities to be given:

We will be providing students with intellectual problems, theory application problems, group discussion and other practical works and also insist them to check the books for references and web resources.

Course Learning Outcome (CLOs)

On completion of the course, behind the students would be able to:

СО	Course Outcome	K-level
CO1	Use the concept of extension fields and prove theorems applying algebraic ways of thinking.	Up to K3
CO2	Examine splitting field in rational fields, extension fields, splitting fields and understand the idea of roots of polynomials.	Up to K4
CO3	Compose clear and accurate proofs using the concepts of Galois Theory.	Up to K4
CO4	Bring out insight into Abstract Algebra with focus on axiomatic theories.	Up to K5
CO5	Demonstrate knowledge and understanding of fundamental concepts includingextension fields, Algebraic extensions and Finite fields.	Up to K5

- K1- Remembering facts with specific answers
- K2- Basic understanding of facts.
- K3- Application oriented
- K4- Analyzing, examining and making presentations with evidence.
- K5- Evaluating, making Judgments based on criteria

Nature of the Course									
Knowledge and Skill Oriented		Employability Orie	nted	Entrepreneurship oriented					

Course Objectives:

- Develop strong background on finding various solutions to firstorder linear and nonlinear Partial Differential Equations (PDE's).
- To solve the nonlinear PDE's by Charpit's method and Jacobi'smethod.
- To focus the formulation of first and second orders PDE's.
- To classify and solving for three basic types namely Hyperbolic, Parabolic and Elliptic PDE's.
- Solving of PDEs which include heat, wave and Laplace's equation that arise in various physical systems.

Course Content:

Unit	Course Content	90 Hours	K Level	CLO
I	Mathematical Models and Classification of Second-Order Linear Equations: Classical Equations- The Vibrating String – The Vibrating Membrane –Waves in an Elastic Medium – Conduction of Heat in Solids – The Gravitational Potential – Second-Order Equations in Two Independent Variables – Canonical Forms – Equations with Constant Coefficients – General Solutions	18	Up to K3	CLO1
Ш	The Cauchy Problem and Wave Equations:The CauchyProblem – T h e Cauchy-Kowalewskaya Theorem – HomogeneousWave Equations – Initial Boundary-Value Problems- E q u a t i o n sw i t h Non-Homogeneous Boundary Conditions – V i b r a t i o no f Finite String with Fixed Ends – Non-Homogeneous WaveEquations – The Riemann Method –Solution of the Goursat Problem– Spherical Wave Equation – Cylindrical Wave Equation	18	Up to K4	CLO2
ш	Method of separation of variables: Separation of Variable- The Vibrating String Problem – Existence and Uniqueness of Solution of the Vibrating String Problem – The Heat Conduction Problem – Existence and Uniqueness of Solution of the Heat Conduction Problem – The Laplace And Beam Equations	18	Up toK4	CLO3

		An	nexure-1	
IV	Boundary Value Problems and Applications: Boundary Value Problems – Maximum and Minimum Principles – Uniqueness and Continuity Theorems– Dirichlet Problem for a Circle, A Circular Annulus, a Rectangle – DirichletProblem Involving the Poisson Equation – Neumann Problem for a Rectangle, a Circle.	18	Up toK5	CLO4
v	Green's Functions and Boundary- Value Problems: Introduction - The Dirac Delta function – Properties of Green's function – Method of Green's function – Dirichlet's Problem for the Laplace and Helmholtz operators – Method of images and eigen functions – Higher dimensional problem – Neumann Problem.	18	Up toK5	CLO5

Pedagogy:

• Chalk and Talk, Powerpoint presentations, Group Discussions, Quiz, Assignment and Seminar **Rationale for nature of Course:**

Knowledge and Skill:

- Students will get the knowledge of basic principles of fluids mechanics
- To get the ability to analyze the fluid flow problems with the application of Bernoulli's theorem.

Activities to be given: We will be providing students with intellectual problems, theory application problems, group discussions and other practical works and also insist them to check the Books for References and web resources.

Course Learning Outcome (CLOs)

On completion of the course, behind the students would be able to:

No.	Course Learning Outcomes	Knowledge Level (According to Bloom's Taxonomy)
CLO1	Describe the principles of motion for fluids	Up to K4
CLO2	Formulate the motion of fluid element	Up to K4
CLO3	Use the dimensional analysis and derive dimensional numbers	Up to K4
CLO4	Understanding of thermo dynamics properties and processes	Up to K5
CLO5	Be able to analyze shock waves	Up to K5

- K1- Remembering facts with specific answers
- K2- Basic understanding of facts.
- K3- Application oriented
- K4- Analyzing, examining and making presentations with evidence.
- K5- Evaluating, making Judgments based on criteria

Mapping of Course Learning Outcomes (CLOs) with Programme Outcomes (POs)

	PO1	PO2	PO3	PO4	PO5	PO6
CLO1	2	1	3	2	3	3
CLO2	1	2	2	2	1	3
CLO3	1	1	3	3	1	3
CLO4	2	2	2	2	2	3
CLO5	2	2	3	2	3	3

1-Basic Level 2- Intermediate Level 3- Advanced Level

Lesson Plan

Unit	Course Content			Mode of
		75	Hours	Teaching
1	Real fluids and Ideal fluids- Velocity of a fluid at a	5	15	Chalk and
	point			Talk
	streamlines path lines- velocity potential	5		
	Vorticity Vector – Equation of continuity – acceleration of a fluid.	5		
II	Equation of motion of a fluid: Pressure at a point in a fluid at rest	5	15	Chalk and Talk
	pressure at a point in a moving fluid-Euler's equations of motion	5		
	Bernoulli's Equation, Bernoulli's theorem.	5		
III	Some two-dimensional flows: meaning of two- dimensional flow	5	15	Chalk and Talk
	stream function – two dimensional image systems	5		
	Milne – Thomson circle theorem –Theorem of Blasius.	5		
IV	Elements of Thermodynamics: The equation of state of a substance – the first law of thermodynamics	5	15	PowerPoint Presentation &Seminar
	internal energy of a gas – specific heats of a gas- function of state; Entropy	5		
	Maxwell's thermodynamics relation	5		
V	Shock waves: formation of shock waves – elementary analysis of normal shock waves	5	15	PowerPoint Presentation
	elementary analysis of oblique shock waves-the method of characteristics for two	5		&Seminar
	dimensional, homentropic, irrational flow.	5

Nature of the Course						
Knowledge and Skill Oriented	Employability Oriented	Entrepreneurship oriented				

Course Objectives:

- To know the desirable qualities for an estimator and learn a number oftechniques for finding minimum variance
- To understands the elements of hypothesis test and be able to carry outa number of different hypothesis test.
- To Formulate, test and interpret various hypothesis tests.
- To Characterize, compare, and contrast different nonparametrichypothesis tests.

Unit	Course Content	75 Hours	K Level	CLO
Ι	Distribution of Functions of Random Variables: Sampling Theory – Transformations of Variables of the Discrete Type – Transformations of Variables of the Continuous Type – The t and F Distributions.	15	Up toK3	CL01
П	Order Statistics: Distributions of Order Statistics - The MomentGenerating Function Technique. The Distributions of X and ns^2/σ^2 – Expectations of Functions of Random Variables.	15	Up toK4	CLO2
Ш	Estimation Theory: Point Estimation – Measures of Quality ofEstimators – Confidence Intervals for Means – Confidence Intervals for Differences of Means - Confidence Intervals for Variances – Bayesian Estimates.	15	Up toK4	CLO3
IV	Statistical Hypothesis : Some Examples and Definitions – Certain Best Tests – Uniformly Most Powerful Tests – Likelihood Ratio Tests.	15	Up toK5	CLO4
v	Nonparametric Methods: Confidence Intervals for Distribution Quantiles – Tolerance Limits for Distributions – The sign Test – A Test of Wilcoxon – The Equality of Two Distributions – The Mann Whitney – Wilcoxon Test.	15	Up toK5	CLO5

We will be providing students with intellectual problems, theory application problems, group discussion and other practical works and also insist them to check the books for references and web resources.

Course Learning Outcome (CLOs)

On completion of the course, behind the students would be able to:

СО	Course learning	K-level
	outcome	
CO1	To determine transformations of variables of discrete and continuous typesand t and F distributions.	Upto K3
CO2	To compute order statistics, moment generating function and expectation of function of random variables	Upto K4
CO3	To construct point and interval estimators and evaluate their goodness.	Upto K4
CO4	To decide as to which test of significance is to be applied for any given large sample problem.	Upto K5
CO5	To analyze the different nonparametric methods in estimation, testing, model fitting, and in analyses.	Upto K4

- K1- Remembering facts with specific answers
- K2- Basic understanding of facts.
- K3- Application oriented
- K4- Analyzing, examining and making presentations with evidence.
- K5- Evaluating, making Judgments based on criteria

Pedagogy:

• Chalk and Talk, Power point presentations, Group Discussions, Quiz, Assignment and Seminar

Rationale for nature of Course

Knowledge and Skill:

Develop a deeper conceptual understanding of the theoretical basis Stability of Markov system – Graph theoretic approach

Apply stochastic problems

E.M.G.Yadava Women's College, Madurai-14.

Activities to be given:

We will be providing students with intellectual problems, theory application problems and other practical works and also insist them to check the Books for References and web

Course Learning Outcome (CLOs)

On completion of the course, behind the students would be able to:

No.	Course Outcomes	Knowledge Level (According to Bloom's Taxonomy)
CLO1	Correlate the concepts of stochastic processes with illustrations	Up to K3
CLO2	Illustrate Markov chain and its applications	Up to K4
CLO3	Compare the conceptualization of pure birth and deathprocess	Up to K4
CLO4	Apply Markov process in solving problems	Up to K4
CLO5	Summarize the concepts of renewal process and its applications	Up to K4

K1- Remembering facts with specific

K2- Basic understanding of facts.

K3- Application oriented

K4- Analyzing, examining and making presentations with evidences

- 3. https://www.ebookbou.edu.bd/Books/Text/SST/DCSA/dcsa_1302/Unit-02.pdf

Pedagogy:

Chalk and Talk, PPT, Group discussion, Quiz. **Rationale for nature of Course:**

Knowledge and Skill:

There are three basic activities of an office automation system: storage of information, data exchange, and data management.

Activities to be given:

Students shall be allowed to write program in many concepts.

Course learning Outcomes (CLO's):

CLO	Course learning Outcomes (CLO's)	Knowledge According to Bloom's Taxonomy (Up to K level)
CLO1	Possess the knowledge on the basics of computers and its	K1 to K3
	components	
CLO2	Gain knowledge on Creating Documents, spreadsheet and presentation.	K1 to K3
CLO3	Learn the concepts of Database and implement the Query in Database.	K1 to K3
CLO4	Demonstrate the understanding of different automation tools.	K1 to K4
CLO5	Utilize the automation tools for documentation, calculation and presentation purpose.	K1 to K4
