SEMINAR ON "IoT IN REAL WORLD"

Objectives

The seminar on "IoT in the Real World" aimed to demonstrate how the Internet of Things (IoT) can revolutionize various sectors by enabling devices to self-report in real-time. The goal was to show how IoT enhances efficiency and provides critical information more swiftly compared to systems that rely on human intervention.

Program Outcome:

Participants gained a clear understanding of how IoT applications are utilized in real-world scenarios. They learned about the role of IoT in decision-making, tracking, and monitoring systems. The seminar highlighted how real-time data collection and analysis facilitated by IoT technologies can significantly improve operational efficiency and support timely and informed decision-making.
