SEMINAR ON "CYBER SECURITY AND PYTHON"

Objectives:

- To provide awareness and foundational training on cyber security concepts through practical applications using Python.
- To demonstrate how Python can be utilized to develop tools for monitoring, detecting, and preventing cyber threats.
- To equip students with hands-on skills to address real-world cyber security challenges using scripting and automation.

Program Outcome:

- Participants gained a basic understanding of cyber security principles and threat landscapes.
- They learned how Python can be effectively used to automate various cyber security tasks such as malware analysis, network traffic monitoring, and vulnerability scanning.
- The seminar enhanced their ability to integrate Python scripting into cyber security practices for improved system protection and threat response.
