HANDS-ON TRAINING ON "BLOOD GROUP ANALYSIS"

Objectives:

- To equip students with practical knowledge and skills in blood group analysis.
- To prepare students for pursuing laboratory technician courses after graduation.
- To enhance understanding of clinical laboratory techniques relevant to medical and diagnostic fields.
- To nurture interest in applied biology and healthcare services.

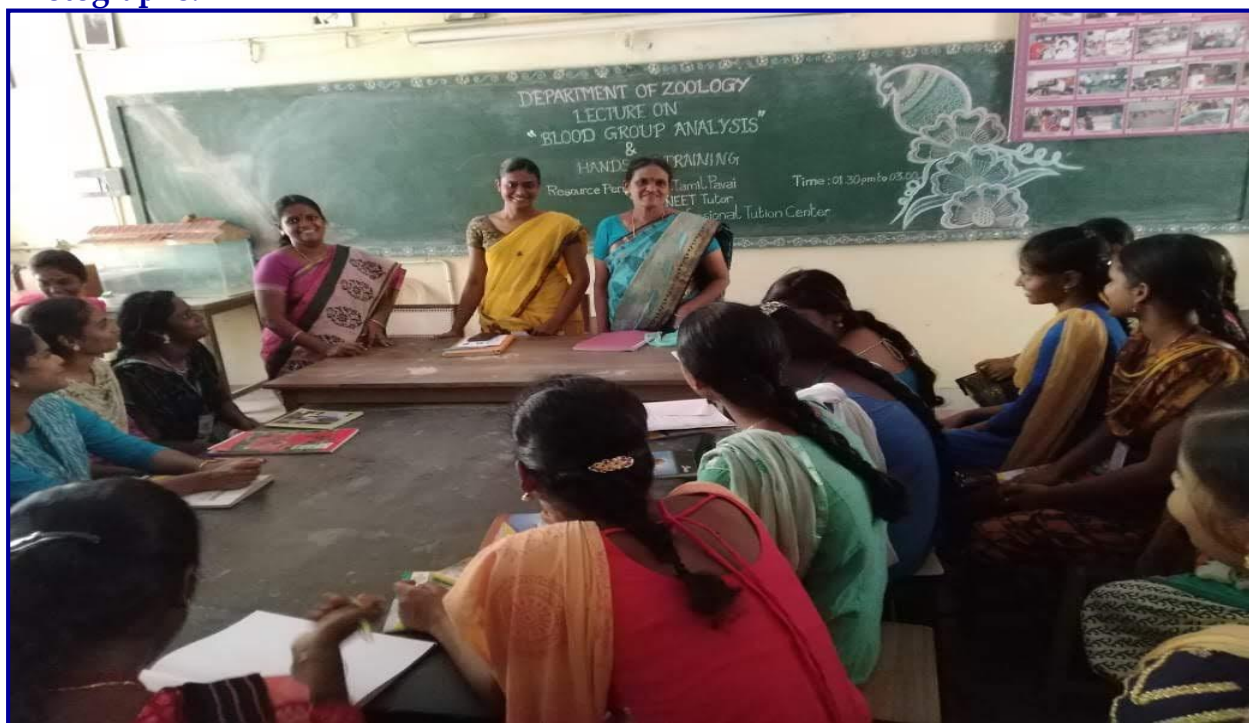

Programme Outcome:

The hands-on training in "Blood Group Analysis" provided students with practical exposure to essential laboratory techniques used in medical diagnostics. Students learned to identify ABO and Rh blood groups through antigen-antibody interactions, enhancing their laboratory skills and scientific understanding. The session not only prepared them for

advanced lab technician courses but also encouraged them to pursue certifications in clinical laboratory practices. By acquiring these skills, students became better positioned to work in hospitals, diagnostic labs, and blood banks. Furthermore, the training inspired entrepreneurial thinking, enabling students to consider starting small diagnostic labs or health-based services in their communities. The program served as a stepping stone toward skill development, employability, and self-reliance in the field of healthcare.
