BRIDGE COURSE ON "INTRODUCTION TO HARDWARE AND SOFTWARE"

Objectives:

- To help students gain a clear understanding of all the components of a computer and the related terminology, enabling them to comprehend the computer as a complete system.
- To ensure students become familiar with every part of a computer and its associated terms so they can understand how a computer functions as a whole.
- To provide students with knowledge of each computer component and essential terminology, allowing them to see how a computer operates as an integrated unit.
- To develop students' understanding of all computer components and their terminologies in order to help them grasp the overall working of a computer.

Programme Outcomes:

After completing the Bridge Course on “Introduction to Hardware and Software”, students will be able to:

- Identify and describe basic computer hardware components such as input, output, storage, and processing devices.
- Understand fundamental software concepts, including system software, application software, and their roles in computer operation.
- Use essential computer terminology correctly and confidently in academic and practical contexts.
- Explain how hardware and software interact to perform computing tasks.
- Demonstrate basic operational skills such as starting a computer, navigating an operating system, installing simple applications, and managing files.
