“Thangamae Thangam” – Special Children Project

The “Thangam Thangam” Special Children Project, organized by Team RBS (Rotary Beyond Self) under Rotary International District 3000, was successfully conducted on 25 July 2026 (Saturday) at E.M.G. Yadava Women's College, Tiruppalai, Madurai. The programme brought together special children from various schools across Madurai and provided a vibrant platform for inclusion, encouragement, recreation, and social engagement.

The event commenced at 9.00 a.m. with the participation of Rotary leaders, government officials, educational administrators, volunteers, teachers, parents, and students. The programme was organized under the leadership of Rtn. RBS Mani, District Governor, Rotary International District 3000, whose vision and commitment towards the welfare of special children made the event a meaningful success.

The programme was graced by Shri C.T.R. Nirmal Kumar, Hon'ble Minister for Electricity and Law, Government of Tamil Nadu, as the Chief Guest. The dignitaries addressed the gathering and emphasized the importance of creating an inclusive society that recognizes the talents and abilities of differently-abled children. They appreciated the efforts of Rotary International District 3000 in promoting social responsibility and community service through such impactful initiatives.

The programme featured a variety of engaging activities designed especially for the participating children. The children enthusiastically took part in recreational events, interactive sessions, and entertainment programmes that fostered confidence, joy, and social interaction. The event provided an opportunity for the children to showcase their talents and abilities in a supportive and encouraging environment.

E.M.G. Yadava Women's College extended its wholehearted support by providing the venue and necessary facilities for the successful conduct of the programme. Faculty members, students, and volunteers actively participated in coordinating the event and ensuring the comfort and well-being of the children and their accompanying teachers and parents.

The programme reflected Rotary's motto of "Service Above Self" and highlighted the collective responsibility of society towards empowering special children. The event served as a reminder that every child deserves equal opportunities, recognition, and care irrespective of physical or intellectual challenges.

The "Thangam Thangam" Special Children Project concluded on a positive note with expressions of gratitude to all dignitaries, organizers, volunteers, participating schools, and supporters. The programme left a lasting impact on everyone present and reinforced the values of compassion, inclusivity, and community service.

Outcome: The event successfully promoted awareness, social inclusion, and emotional well-being among special children while strengthening collaboration between educational institutions, Rotary clubs, government agencies, and the local community.
