ENTRY LEVEL TEST ON "INTRODUCTION TO HARDWARE AND SOFTWARE"

Objectives:

- To test the students' understanding of the basic physical parts of a computer such as the CPU, disk drive, hard disk, keyboard, modem, monitor, printer, etc., as well as software-related components such as RAM, ROM, networks, and operating systems.
- To evaluate their knowledge of essential computer components and terminology in order to tailor subsequent instruction and support effectively.

Program Outcomes:

On Successful Completion of the Programme,

The test effectively assessed students' proficiency in basic computer terminology and concepts through an MCQ-based evaluation of their understanding of key components such as the CPU, RAM, hard drives, and peripheral devices, as well as fundamental software concepts like operating systems and applications. The results provided valuable insights into the students' initial knowledge levels, helping to identify areas that required further clarification and support. This assessment enabled educators to better address students' learning needs and tailor future instructional content to enhance their comprehension of computer fundamentals. By the end of the test, students gained a clearer understanding of their starting point, allowing for a more focused and effective learning experience in subsequent lessons.
