ENTRY LEVEL TEST

Objectives:

- To assess the basic knowledge of students in Zoology at the time of entry.
- To evaluate students' understanding of concepts studied at the higher secondary level.
- To identify the academic readiness of students for the undergraduate Zoology curriculum.
- To provide a foundation for planning academic support based on student performance.

Programme Outcome:

The Entry Level Test served as a diagnostic tool to assess the knowledge level of first-year students enrolling in the B.Sc. Zoology programme. The test results allowed faculty to categorize students on a three-point scale – high performers, average learners, and slow

learners. This classification enabled the department to tailor academic support and interventions accordingly. Slow learners were given additional attention through bridge courses, peer mentoring, and remedial classes, ensuring they could keep pace with the curriculum. The test also helped in curriculum planning by highlighting areas where students needed more focus, thus promoting an inclusive and supportive learning environment.
