GUEST LECTURE ON "ADOLESCENT HEALTH EDUCATION"

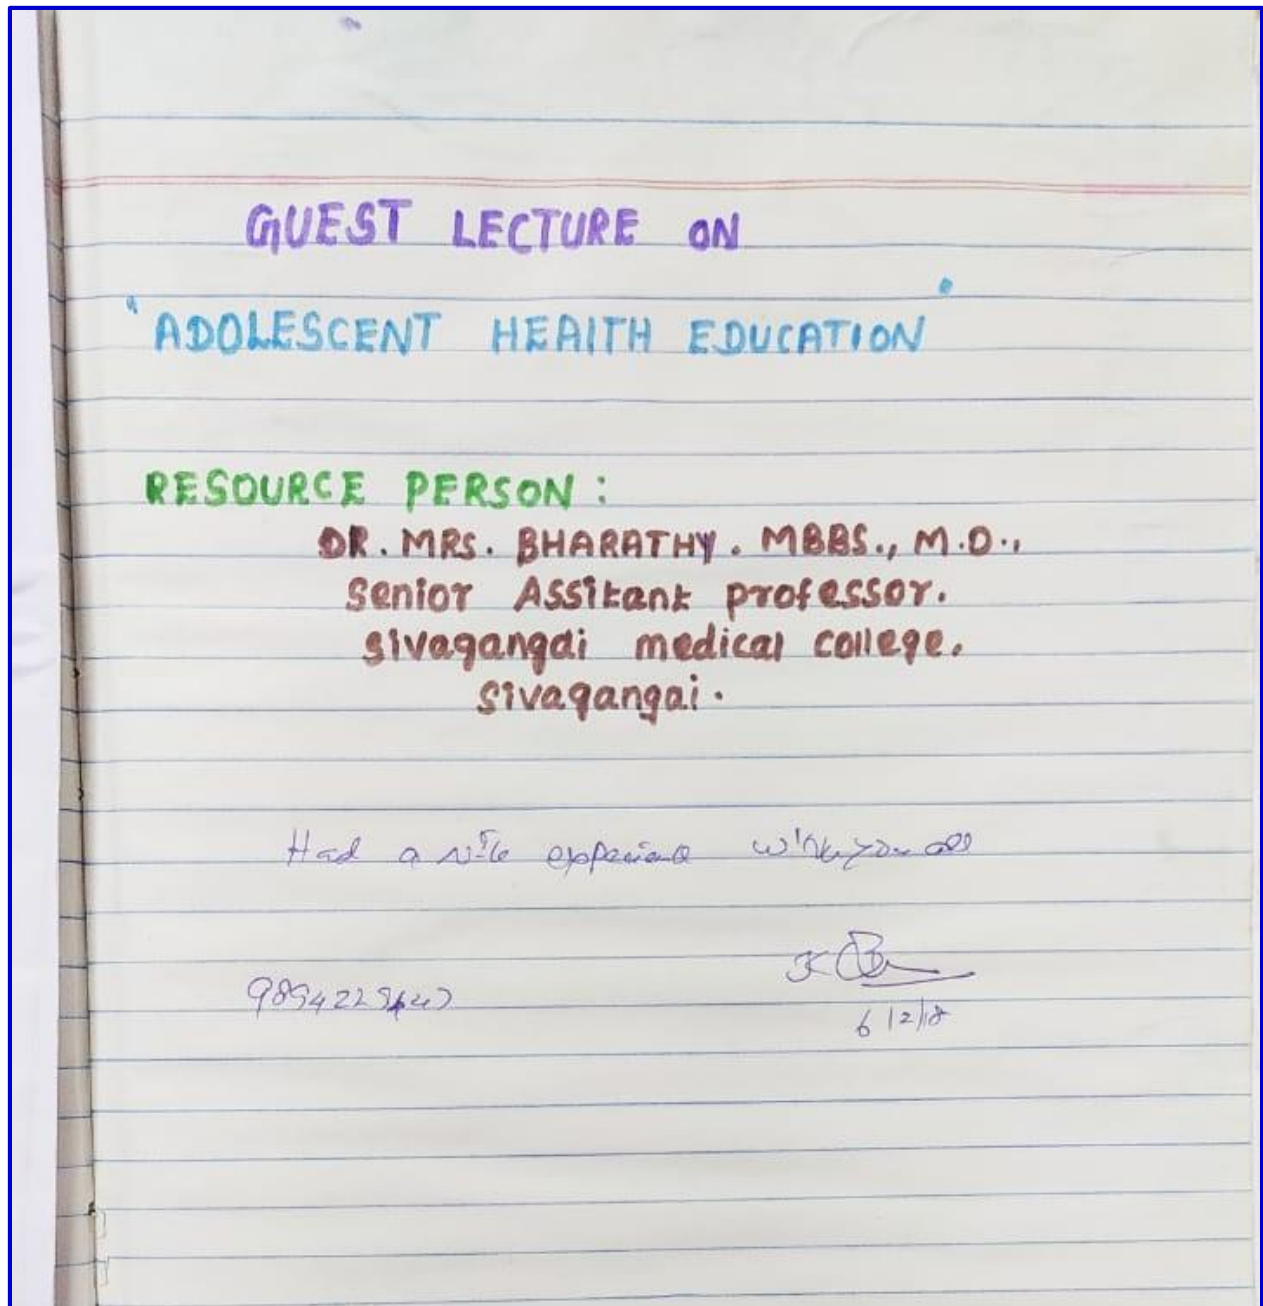

Objectives:

- To educate students about the importance of health, hygiene, and self-care during adolescence.
- To raise awareness about common physiological and psychological issues faced by adolescents.
- To equip students with knowledge and strategies to address these challenges effectively.

Programme Outcome:

Through this guest lecture, students gain valuable insights into the significance of maintaining mental and physical well-being during adolescence. They develop an understanding of the interplay between physical health, mental health, and overall quality of life. By recognising and addressing health issues in themselves and others, students become empowered to develop a supportive and healthy environment within their immediate community. This event promotes a culture of proactive self-care and empathy, contributing to the holistic development of students as individuals and members of society.
