SEMINAR ON "MACHINE LEARNING"

Objectives:

- To introduce the core concepts and objectives of machine learning.
- To explain how algorithms and models are developed to enable computers to learn from data and make data-driven decisions without being explicitly programmed.
- To provide insights into real-world applications of machine learning across various domains.

Program Outcome:

- Students gained a solid understanding of fundamental machine learning algorithms, such as supervised, unsupervised, and reinforcement learning techniques.
- They developed the ability to analyze datasets, build predictive models, and evaluate model performance.
- The seminar enhanced their readiness to apply machine learning concepts in fields like data science, artificial intelligence, and automation.
