WORKSHOP ON "FOLDScope: CONSTRUCTION & UTILITY"

Objectives:

- To introduce students to the concept and design of the foldscope – an affordable, user-friendly paper microscope.
- To provide hands-on training in assembling and using the foldscope effectively.
- To enhance students' interest in microscopy and field-based research.
- To demonstrate the practical applications of foldscope in biological studies and environmental monitoring.
- To promote low-cost scientific tools for use in academic and research settings.

Programme Outcome:

The workshop offered a unique and engaging learning experience for the students. They successfully assembled their own foldscopes and explored microscopic specimens with curiosity and precision. The session helped them understand the working principles of this innovative tool and its wide range of applications in scientific observation. By the end of the workshop, students gained confidence in using foldscope as a portable microscope, which significantly boosted their enthusiasm for exploring the microscopic world and sparked interest in scientific research.
