No. of Participants	Students - 15	

COMPUTER HARDWARE MAINTENANCE IN O LEVEL

FREE COACHING CLASS

Objectives:

1. To provide fundamental knowledge of computer hardware components and their functions.

2. To enable students to identify, assemble, and disassemble basic computer systems.
3. To develop skills in diagnosing and troubleshooting common hardware problems.
4. To familiarize students with preventive maintenance practices and safety procedures.
5. To introduce students to peripheral devices and their installation and configuration.
6. To enhance technical competence and employability skills related to computer hardware maintenance.
7. To offer hands-on practical training aligned with the O level curriculum requirements.

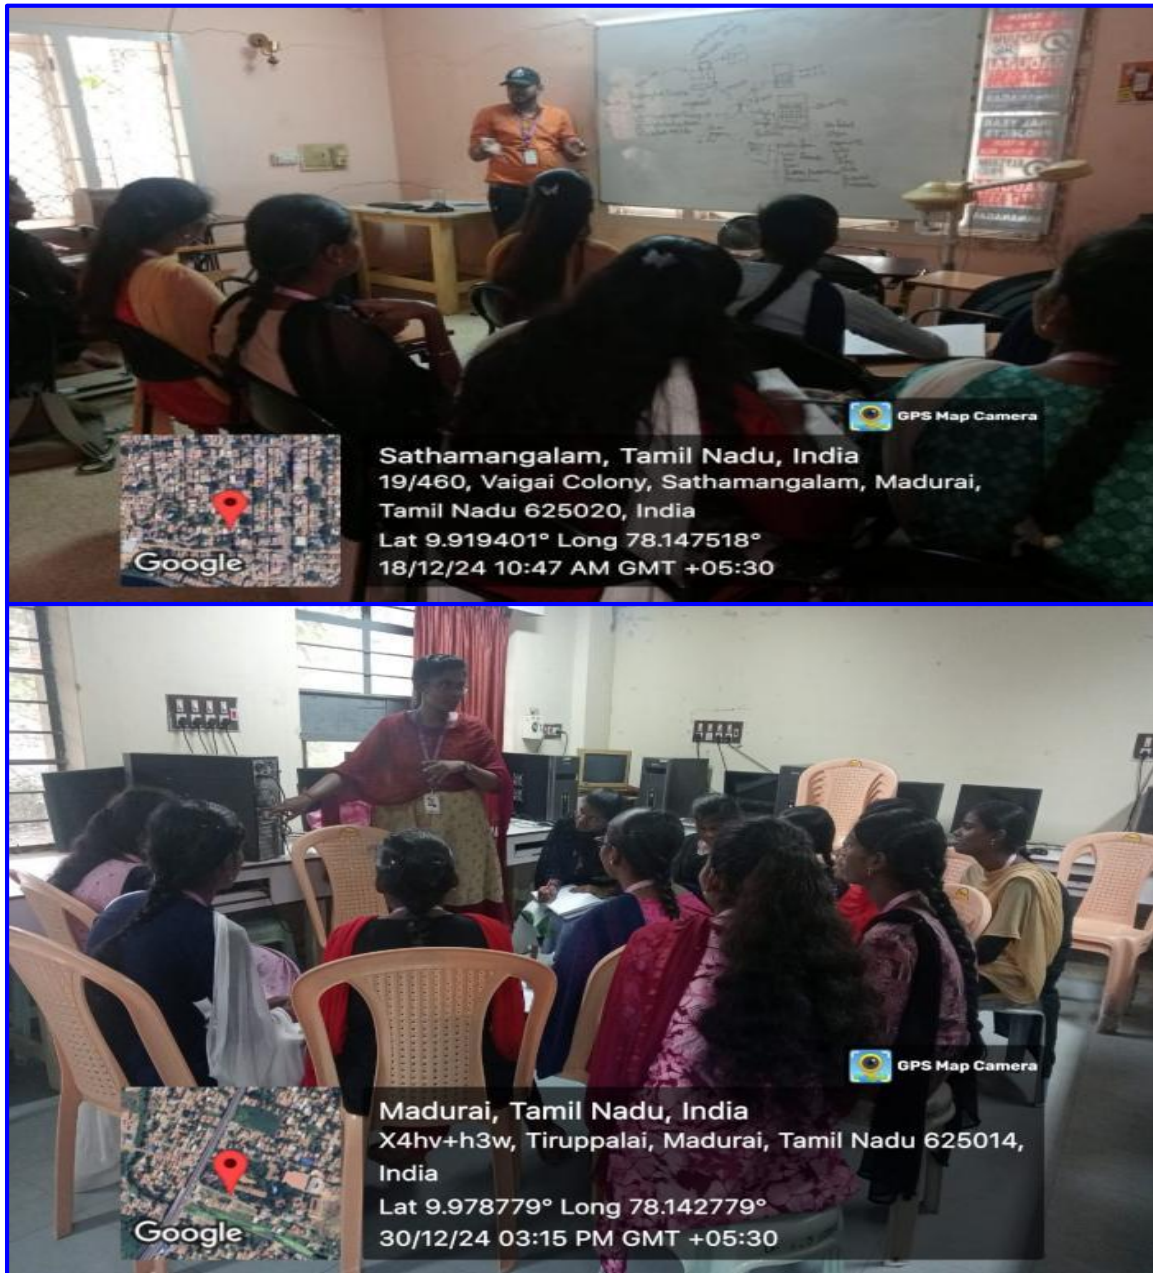

Programme Outcomes:

Upon completion of the Computer Hardware Maintenance in O Level Free Coaching Class, the students were able to:

1. Understand the functions and working principles of essential computer hardware components.
2. Identify, assemble, and disassemble computer systems with proper handling techniques.
3. Diagnose and troubleshoot common hardware-related issues effectively.
4. Apply preventive maintenance practices and follow standard safety procedures during hardware operations.
5. Install, configure, and manage peripheral devices efficiently.
6. Demonstrate improved technical competence and readiness for entry-level employment in hardware maintenance and IT support roles.
7. Apply practical knowledge gained through hands-on training in accordance with O level curriculum standards.
