HANDS-ON TRAINING ON "BLOOD GROUP ANALYSIS"

Objectives:

To enable participants to identify and name the four major blood types (phenotypes) in the ABO system.

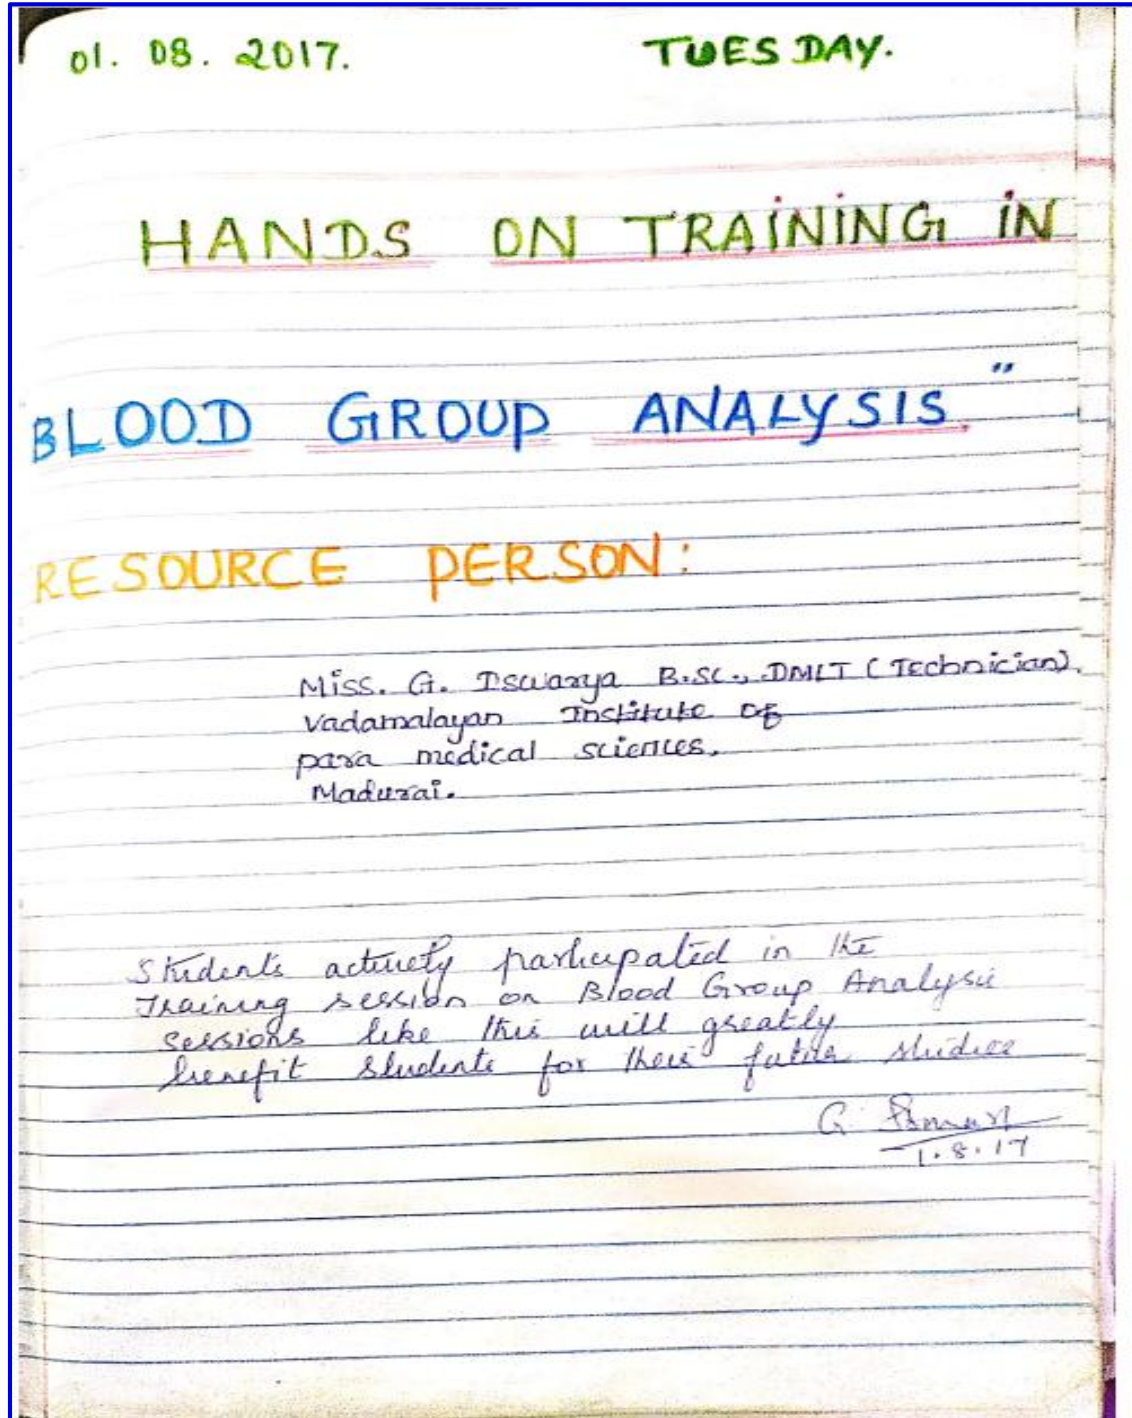

To familiarise students with the practical aspects of blood group analysis, including sample collection, testing procedures, and result interpretation.

Programme Outcome:

Through this hands-on training, students gained the ability to recognise and differentiate between the four major blood types (A, B, AB, and O) in the ABO system. By becoming aware of their blood groups, participants understand the significance of accurate

blood typing, especially in blood transfusions. This practical knowledge enhances their preparedness to contribute effectively in healthcare settings, ensuring safe and compatible blood transfusions when needed.
